

Science

Earth & Space

Journey through the solar system to understand the movements of the Earth, Moon and Sun.

Everyday Materials

Investigate common materials and compare their properties to understand what makes them useful.

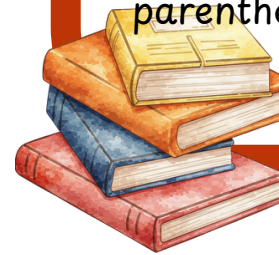

English

Autumn 1

Children will create an imaginative journey through space and present information in a formal style. They will develop modal verbs and relative clauses and use parenthesis while writing a narrative and formal mission report.

Autumn 2

Children will create detailed, atmospheric settings and explore how letters communicate experiences and ideas. They will develop formal vocabulary and cohesive paragraphs and use punctuation for parenthesis while writing a setting narrative and letter.

Maths

Autumn 1

Children develop their understanding of decimal fractions and apply this knowledge when calculating with and solving problems involving money.

Autumn 2

Children explore negative numbers and develop efficient multiplication and division strategies, including short multiplication and short division.

RE

Is believing in God reasonable?

Children consider arguments for and against belief in God and develop their own informed viewpoints.

How has belief impacted on music and art through history?

Children explore how religious beliefs have inspired influential works of art and music throughout history.

Music

Don't Stop Believin'

Children develop more advanced performance, composition and improvisation skills through popular music.

BBC Ten Pieces - Mars the Bringer of War

Children listen critically to orchestral music and explore how composers create mood and atmosphere.

Computing

Systems and Searching

Pupils explore how computer systems work together and investigate how search engines find, rank and present information.

PE

Fitness & Athletics

OAA & Rugby

YEAR 5 AUTUMN

RSHE

Digital Resilience

Pupils learn to navigate the online world safely by evaluating information, understanding digital footprints and recognising online risks.

Health & Wellbeing

Pupils explore how lifestyle choices affect both physical and mental health, developing strategies for lifelong wellbeing.

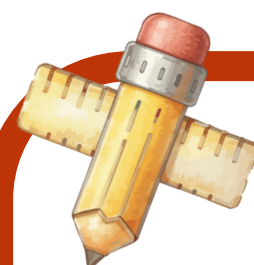

Art

Space

Children create imaginative artwork inspired by space, experimenting with texture, colour and composition to develop original ideas.

DT

Mechanical Systems (CAM Toys/Gears)

Design and build a moving toy using cams, gears or pulleys to create purposeful mechanical movement.

MFL

Pleased to Meet You

Pupils build on prior learning by describing themselves, expressing feelings and beginning to talk about future intentions.

History

No history unit this term.

Geography

Mountains

Children investigate how mountains are formed, where they are found and how they influence climate, landscapes and human activity.
